Patent No. 6812339
GENERAL INFORMATION:
APPLICANT: VENTER, J. Craig et al.
TITLE OF INVENTION: POLYMORPHISMS IN KNOWN GENES.
TITLE OF INVENTION: WITH HUMAN DISEASE, METHODS FILE REFERENCE: CLOO1307
CURRENT APPLICATION NUMBER: US/09/949,016
CURRENT FILING DATE: 2000-04-14
PRIOR APPLICATION NUMBER: 60/241,755
                                                                                                                                                                        Sequence 1750,
                                                                                                                                                                                                                                                                                                                                  1943
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    1775
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                1715

ი

No. 18 the number of results predicted by chance to have a

score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
